PROJECT PROPOSAL

ATHENS
1984 - 2010

INCENTIVES FOR THE FORMATION OF THE OLYMPOS ASSOCIATION

In response to the personal invitation of **Mr. Paul C. Pissanos**, some 80 of us gathered in his offices at No. 6 Saripolou Street. Mr. Pissanos imparted to us his original inspiration - now registered in the archives of the National Library under serial No. 0545 - for the building of an **ANCIENT POLIS** (CITY), with the fundamental purpose of constituting a recognized spiritual world center and a cradle of knowledge, for science and art.

A center of congregation and exchange of thoughts of eminent scientists, enlightened intellectuals and artists from the further reaches of the world, where they would confer and collaborate for the furthering of the common cause and the fight for morals and logic and applying their weight and prestige towards the removal of the accursed threat of nuclear war, destruction and the annihilation of the human species.

A center of revival of modern technological culture according to the principles and **philosophy** of the **classical ancient Greek spirit**.

The speaker then described the striking details of his visionary planning and of the purely ideological objectives which will be promoted by this imposing project: **THE SPIRIT OF LOVE AND UNIVERSAL HUMAN COOPERATION, PROGRESS and PEACEFUL COEXISTENCE OF NATIONS**.

The vibrant rallying tone of the speech and the deep impression made upon us by the truly enlightened vision of this revival of the classical Greek spirit, made us decide on the formation of a spiritual and educational society with the purpose of contributing and striving towards the realization of this impressive plan.

The association will apply, on an international level, for moral and material support to any non-fanatic, logical and untainted citizen of the world, to assist in the building of this fine - marble **Olympic City**.

Our unanimous response overjoyed our host, and he gladly accepted to grant and entrust to the Association under formation, his plans and detailed program at NO PERSONAL BENEFIT other than the honorary retention for himself and his legal successors of the **SPIRITUAL PATERNITY** which naturally and understandably belongs to him and which can be contested by none. He added, moreover, that he would cooperate with all his strength to realize and fulfil this gigantic task of the future, by our association.

The above constitutes the true testimonial of the basic needs which led us to found the nucleus of this intellectual association.

"OLYMPUS" - UNIVERSAL INTELLECTUAL CENTER.

What do people of the new millennium expect from **Philosophy**? Two main things:

Firstly, that it meets life’s real needs, so that the essential result is the beneficial development of the applied sciences, and especially technology, which is advancing at such a rapid pace.

Secondly, that it ensures individuals the balance, which was violently torn from their souls by their living conditions and their participation in a modern, non-spiritual society, whose only aims are the acquisition of money.

Resolving these problems will result in the development of **ETHICAL PHILOSOPHY**, which has been absent for so many centuries from most sections of society.

As the guardian of “**HEPTAPOLIS**” institutions, the **ACADEMY OF NATIONS** will undertake to establish and uphold new ideas, through the awakening of individuals’ philosophical spirit, to lay the foundations of a more humane life and to acquire the happiness that comes from moral gratification of the conscience.

WORLD FUND GREEN TAXATION

It is clear that the large population of the world such as America, China, India etc., is too onerous for them to adapt in time required by the rapidly increasing risk to the ecosystem of pollutant energy sources with new sources of geothermal energy, wind and solar energy.

The implemented programs to date replacement of energy sources are rudimentary compared with the imminent threat that continues to increase, undermining the bio-health of the planet. The obligation of people everywhere on Earth is irrevocable: “**We in every way and every way to register all participating directly in the program saving the planet with our hosts**”. The Global ‘**Green Tax Fund**’ should be the predominant purpose for the Heads of the Western world.

If the population of advanced countries, which is more than 2,200,000,000 people taxed at 20 € per year per person, 100 € a year for business mild energy use, and a significant amount for any company that uses polluting energy for the operation, will create a Global Green Fund, which could amount to a € 50 billion per year or more, to take steps accordingly direct replacement of those energy sources used today, destroying the ecosystem.

The **International Green Fund** supported by both International and European subsidy programs and sponsoring institutions and Ecological Foundations. The program is super-cultural decontamination and cleaning up the planet, will take on a multinational team of technocrats and international scholars, whose head offices will be located in the **GREEN PLANET EARTH “HEPTAPOLIS”**.

The **International Fund “GREEN TAXATION”** will be under international financial and managerial control, composed of executive officials-representatives of powerful nations to participate and work with the following plan:

Board, Legal Council, Advisory Committee, Audit Council, Department of subsidies on Western Member States of the United Nations.
